Summary

I'm a Full Stack Developer with 2+ years of experience building modern web applications using React, Next.js, TypeScript, Node.js, NestJS, and PostgreSQL. Experienced across frontend and backend development, with a strong focus on building maintainable architectures, REST APIs, authentication, database-driven applications, and responsive user interfaces. I enjoy solving complex problems, learning new technologies, and turning business requirements into reliable software.

Technical Skills

Languages: TypeScript, JavaScript, SQL, HTML/CSS
Frontend: React, Next.js (App & Pages Router), TanStack Query, Zod, Tailwind CSS, Shadcn/UI, Material-UI, Framer Motion
Backend: Node.js, NestJS, Express.js, REST APIs
Databases & Caching: PostgreSQL , MySQL, MongoDB, Redis
Testing: Jest, Cypress
AI: Cursor, Claude Code

Professional Experience

Full Stack Developer — Inventory Distribution System

May 2026 - Present

Developed a multi-tenant inventory distribution platform connecting a central warehouse with multiple retail shops, enabling inventory management, warehouse distribution, sales, customer credit, and business analytics.

- **Architected** a multi-tenant platform supporting warehouse administrators, shop owners, and employees while maintaining centralized inventory, ordering, and reporting across multiple retail shops.
- **Engineered** end-to-end warehouse distribution workflows, covering order creation, approval, shipment, receipt, inventory synchronization, and stock movement with transactional consistency.
- **Designed and implemented** customer credit management, including partial payments, debt tracking, FIFO payment allocation, aging reports, and immutable financial ledgers to support real-world retail credit operations.
- **Built** an offline-first Progressive Web App (PWA) using IndexedDB, queued synchronization, and conflict resolution, allowing sales and inventory operations to continue during unreliable network conditions.
- **Implemented** inventory costing using weighted-average cost calculations and immutable transaction snapshots, ensuring historical sales and profit reports remain accurate even after pricing changes.
- **Developed** role-based authorization, multilingual support, analytics dashboards, audit logging, and optimized backend services to improve security, traceability, and application performance.

Technologies: React, Next.js, TypeScript, Tailwind CSS, TanStack Query, Zustand, NestJS, PostgreSQL, JWT Authentication, REST APIs, IndexedDB, Docker.

Full Stack Developer — SportBooker Platform

Jan2026 - Apr 2026

Contributed to the development of a multi-tenant sports booking platform serving the Syrian community through Syria Sport, enabling players, venue operators, and administrators to manage bookings, schedules, and sports facilities.

- **Developed** responsive user interfaces for players, operators, and administrators, delivering a consistent experience across desktop and mobile devices.
- **Implemented** role-based access control and authentication workflows, ensuring secure access for administrators, operators, staff, and players.
- **Integrated** REST APIs for authentication, bookings, scheduling, user management, and tenant-specific data, improving application reliability and user experience.
- **Contributed** to a multi-tenant architecture using subdomains to isolate organizations while sharing a common application platform.
- **Built** reusable React components and centralized state management with Zustand, improving maintainability and accelerating feature development.
- **Worked** across both frontend and backend, contributing to NestJS services, PostgreSQL database design, migrations, and seed data management.

Technologies: React, Vite, TypeScript, Tailwind CSS, Zustand, NestJS, PostgreSQL, REST APIs.

Freelance Full Stack Developer — Khamsat Jan2025 -Sep 2025

Contributed to the development of a multi-tenant sports booking platform serving the Syrian community through Syria Sport, enabling players, venue operators, and administrators to manage bookings, schedules, and sports facilities.

- **Developed** responsive user interfaces for players, operators, and administrators, delivering a consistent experience across desktop and mobile devices.
- **Implemented** role-based access control and authentication workflows, ensuring secure access for administrators, operators, staff, and players.
- **Integrated** REST APIs for authentication, bookings, scheduling, user management, and tenant-specific data, improving application reliability and user experience.
- **Contributed** to a multi-tenant architecture using subdomains to isolate organizations while sharing a common application platform.
- **Built** reusable React components and centralized state management with Zustand, improving maintainability and accelerating feature development.
- **Worked** across both frontend and backend, contributing to NestJS services, PostgreSQL database design, migrations, and seed data management.

Technologies: React, Vite, TypeScript, Tailwind CSS, Zustand, NestJS, PostgreSQL, REST APIs.

Education & Certifications

- B.Sc. Computer and control engineering Lattakia University, Syria | 2021 – Present
- Fundamentals of Database Engineering
